GrantScape secures new grant programmes

2007

GrantScape's Future

Since 1997, our grant-making has been characterised by its variety and impact. GrantScape has firmly established itself both as a leader in environmental grant-making and as one of the UK's major grant-makers. We are committed to building on this position in the future.

Over the next five years, we will diversify and expand the income streams that support the grant programmes we administer for other organisations. We will also continue to manage grant programmes under the Landfill Communities Fund.

Funders, fund-seekers and other voluntary and community sector organisations will continue to benefit from our expertise. In this respect, the services provided by our trading company, GrantScape Services Limited, will be pivotal. The profit it generates will enable GrantScape to fund its own grant programmes, supporting even more fantastic projects throughout the UK.
